TECHSTAR GLOVE

MOTOCROSS / OFF-ROAD

£39.99

CODE: 3560125

SIZE: S - 2XL

ABOUT: Made from advanced, stretch fabric for a precise feel with the levers and grips, the new Techstar Gloves are designed to offer pro-level protection. Featuring a high flex upper construction with a thermoformed knuckle area and stretch micro ripstop top hand for additional comfort and protection, the Techstar Gloves have a reinforced synthetic suede palm for high levels of durability. The palms are made from conductive material for flawless use with smartphones and other GPS touchscreen devices. The gloves also have a new molded, seamless closure for a secure fit.

KEY

FEATURES: Designed specifically for professional racing.

Ergonomic palm and thumb reinforcements on the grip contact area with hyper flexible, suede for enhanced durability.

Ergonomic stretch insert on palm for an optimized fit.

Flexible and ultra-fitted construction for enhanced control and optimized freedom of movement.

One-piece synthetic conductive palm and stretch micro ripstop backhand. Multi-material chassis constructed from stretch and synthetic suede for a performance fit and enhanced durability.

Thermoformed neoprene knuckle area for enhanced comfort and protection.

Wrapped fingertips on first and second fingers, with expansion seam on first, second, and third fingers.

Silicone grip on first and second fingers.

Sew free cuff binding.

New seamless closure strap with molded hook Velcro fastener on the inside for a safe and secure closure.

Padded landing zone for increased comfort.

Pull tab with silicone grip for quick and easy entry into the glove.

Sublimated graphic on backhand.

RADAR PRO GLOVE

MOTOCROSS / OFF-ROAD

£32.99

CODE: 3560325

SIZE: S - 2XL

ABOUT: Highly breathable, ultra-lightweight and packed with excellent comfort features, the Radar Pro Gloves incorporate a single-layer construction all around, with a single-layer 4-way stretch mesh backhand and synthetic suede side hand reinforcements for high levels of comfort and improved feeling with the bike's controls. For the MX25 line, the Radar Pro Gloves have conductive material for the palm and fingers, and a seamless integrated, wrist closure strap.

KEY FEATURES: Performance construction with a single layer palm and stretchable single layer backhand for optimised fit and feel.

Rolling palm fingertips on external fingers for additional durability.

Localised palm perforations on the palm and back hand of the thumb for enhanced breathability.

Synthetic suede palm for high levels of durability.

Conductive palm and fingers for use with smartphones and touchscreen devices.

Wrapped tips and silicone grip on first and second fingers.

Synthetic suede thumb reinforcement.

Sew free cuff binding.

Pull tab with silicone grip for quick and easy entry into the glove.

Seamless molded hook Velcro closure strap for security.

Sublimated graphic on backhand.

BIONIC XTR PLASMA PROTECTION JACKET

MOTOCROSS / OFF-ROAD

£299.99

CODE: 6507625 -132 BLACK RED WHITE

SIZE: S - M - L - XL - XXL

ABOUT: Engineered for all forms of off-road riding, the Bionic XTR Plasma Protection Jacket features anatomically profiled Nucleon Plasma protectors mounted in a soft-touch chassis on highly breathable padding for supreme levels of protection, comfort, light weight and airflow.

This jacket is equipped with a composite Nucleon Plasma and semi rigid thermoplastic protector construction on the chest, back, shoulders and elbows for maximum impact protection while being supremely adaptive.

KEY FEATURES: The floating Level 2 CE certified chest protector features a Nucleon Plasma protector with a semi-rigid thermoplastic outer shell mounted on a highly perforated 3-D mesh for the optimum blend of protection, light weight, adaptability, flexibility, and superior airflow and breathability.

Flexible chest side wings are separately attached for maximum flexibility and a superior performance fit.

The Level 2 CE certified floating back protector is a composite construction and has a central semi-rigid thermoplastic zone on a Nucleon Plasma back protector for greater impact force dispersion in a critical area.

Bionic Neck Support compatibility via the removable Nucleon Plasma puck.

The removable elbow and shoulder protectors are mounted on a highly breathable slim fit stretch mesh chassis and feature two independent, strategically positioned thermoplastic shells for enhanced levels of abrasion resistance and sliding performance, while also delivering additional impact performance.

Strategically positioned padding on the sleeves and sides of the slim fit chassis for additional tire roost coverage.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, this knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
- Equipped with adjustable shoulder and side straps for an optimised performance fit.
- The side straps are equipped with a V-configuration to ensure a performance fit that follows the curvature of the spine and prevent material bunching.
- Removable soft tactile thermoformed shoulder padding for enhanced rider comfort.
- Bionic Neck Support compatibility via the BNS shoulder pull tabs and removable back puck panel.
- The mesh chassis features a central zipper for ease of use and practicality.
- The liners are ribbed for superior airflow while also reducing the amount of material that is in contact with the skin.
- The elbow and shoulder protectors are removable, allowing quick and easy washing.

BIONIC PRO V3 PLASMA PROTECTION JACKET

MOTOCROSS / OFF-ROAD

£249.99

CODE: 6500125

SIZE: S - M - L - XL - XXL

ABOUT: Premium materials combined with innovative design create a soft protection jacket that is light, ergonomic and extremely durable. Equipped with Nucleon Plasma shoulder and elbow protectors for superior levels of impact protection, this jacket is constructed from a breathable stretch mesh to offer high levels of ventilation while keeping the protection close to the rider's body. Compatible with Alpinestars BNS.

KEY FEATURES: Featuring a removable floating chest comprising a thermoformed outer shell and EVA protector mounted on a 3-D mesh for the optimum blend of protection, light weight, adaptability, flexibility, and superior airflow and breathability.

The Cell technology back protector is engineered with a flexion groove strategically positioned to perfectly follow the curvature of the spine for maximum adaptivity.

The back protector is equipped with a removable puck for BNS compatibility.

The Nucleon Plasma elbow and shoulder protectors are mounted on a highly breathable slim fit stretch mesh chassis for an enhanced performance fit.

Strategically positioned padding on the biceps and chest for additional tire roost coverage.

The slim fit chassis features a height adjustable elastic waist belt for a customised fit.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, this protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

- TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
 - Central front zipper for a ease of use and greater practicality.
 - BNS compatible with a removable back puck panel and elastic BNS pull tabs.
 - Cell Technology back protector that is highly ventilated and flexible.

A-5 PLASMA CHEST PROTECTOR

MOTOCROSS / OFF-ROAD **£199.99**

CODE: 6700825

SIZE: XS/S-M/L-XL/XXL

ABOUT: Anatomically profiled for all forms of off-road riding including Motocross and Supercross, the A-5 Plasma chest protector features composite Nucleon Plasma and semirigid thermoplastic chest and back protector shells that are engineered to be lightweight, breathable, comfortable, adaptive and protective.

KEY FEATURES: The Level 2 CE certified chest and back protectors are mounted on a highly perforated 3-D mesh for superior airflow and breathability.

The side wings are independent from the main semi-rigid chest protector outer shell to ensure a fully adaptive fit.

The Level 2 CE certified back protector is a composite construction and has a central semi-rigid thermoplastic zone on a Nucleon Plasma back protector for greater impact force dispersion in a critical area.

Protectors have an adaptive for that perfectly follow the body's contours for superior comfort and freedom of movement.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, this knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

SUPERTECH RK-10 PLASMA KNEE BRACE

MOTOCROSS / OFF-ROAD

£849.99

CODE: 6501425 -13 BLACK RED

SIZE: S - M - L - XL

ABOUT: With a compact low-profile design offering superior levels of off-road performance during dynamic movement, the Supertech RK-10 knee brace has been engineered to provide the highest level of knee support. The RK-10 is ultra-light-weight, ultra-breathable, ultra-comfortable and ultra-protective, and features a free-floating Nucleon Plasma knee protector encased in an innovative asymmetric forged carbon fiber frame construction for the highest levels of rigidity and superior weight saving properties.

KEY FEATURES: Developed using feedback from professional MX riders, this 34-layer carbon fiber frame is engineered for the optimal balance of flexibility and rigidity to deliver the highest levels of rider comfort and support while reducing the risk of sustaining injuries to the medial and lateral collateral ligament, the anterior and posterior cruciate ligament, and the lateral and medial meniscus.

This frame geometry was meticulously formulated using countless 3-D scans of professional athletes to ensure the optimal internal volume and precise hinge width for maximum comfort during use.

The extremities of the upper and lower frames feature an innovative soft and flexible construction with a smooth transition to prevent the hard edges of the carbon fiber frame coming into direct contact with the skin.

The replaceable knee cups are constructed with a polyurethane outer shell backed with a Nucleon Plasma protector for the optimum blend of impact protection, flexibility and scratch resistance.

The strategically positioned upper and lower patella extensions ensure maximum coverage regardless of the flexion or extension angles.

The extremely stable, compact low-profile four-point hinge system perfectly follows the articulation of the knee while the extension stops, which are available in a range from 0 to 30 degrees, assist in setting the brace to the desired maximum opening angle.

The replaceable hinge covers transition smoothly from the hinges to the frame, effectively eliminating any steps in the construction to avoid any possibility of material snagging.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, the knee protector/cup offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
- Soft tactile non-slip Neoprene padding ensures the highest levels of rider comfort while keeping the knee brace securely in position. Replaceable as a spare part.
- Soft-touch neoprene condyle padding further prevents slipping of the knee brace and comes in different thicknesses for a customised fit. Replaceable as a spare part.
- X-straps are profiled to avoid pinching the back of the knee when fully flexed.
- Nucleon Plasma embedded into the shin padding for additional protection.
- Non-grip upper and lower patella padding to avoid friction.
- High tensile strength buckles are robust while still being flexible for easy strapping and adaptivity.
- Inner-knee central buckles are mounted internally inside the frames to avoid contact with the bike.
- The RK-10 knee brace is available in four size (S, M, L and XL) for a more personalised and secure fit.

PROTECTION:

KNEES (EN 1621-1:2012): **LEVEL 1**

SUPERTECH RK-10 PLASMA KNEE BRACE

6501425 -13

RK-7 PLASMA KNEE BRACE

MOTOCROSS / OFF-ROAD

£399.99

CODE: 6500825 -13 BLACK RED

SIZE: S - M - L - XL

ABOUT: With a slim ergonomic design offering a high level of offroad performance and comfort during dynamic movement, the Supertech RK-7 knee brace has been engineered to provide superior knee support, while still being lightweight, breathable, comfortable, and protective. This knee brace features a free-floating Nucleon Plasma knee protector encased in an innovative asymmetric fiber reinforced frame construction for enhanced levels of rigidity.

KEY FEATURES: This brace provides optimal structural integrity, rigidity and comfort, and thus reduces the risk of sustaining injuries to the medial and lateral collateral ligament, the anterior and posterior cruciate ligament, and the lateral and medial meniscus.

The replaceable knee cups are constructed with a polyurethane outer shell backed with a Nucleon Plasma protector for the optimum blend of impact protection, flexibility and scratch resistance.

The replaceable strategically positioned upper and lower patella extensions ensure maximum coverage regardless of the flexion or extension angles.

The extremely stable, slim-design four-point hinge system perfectly follows the articulation of the knee while the extension stops, which are available in a range from 0 to 30 degrees, assist in setting the brace to the desired maximum opening angle.

The stainless steel bushings in the four-point hinge system have an anti-oxidation treatment.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, the knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage in all riding positions.

TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
- Soft-touch thermoformed padding ensures the highest levels of rider comfort while keeping the knee brace securely in position. Replaceable as a spare part.
- Soft-touch thermoformed condyle padding comes in different thicknesses for a customised fit. Replaceable as a spare part.
- Nucleon Plasma embedded into the shin padding for additional protection.
- Equipped with padded X-straps backed with a nonslip material to ensure the knee brace remains securely in position while riding.
- X-straps are profiled to avoid pinching the back of the knee when fully flexed.
- High tensile strength buckles are robust while still being flexible for easy strapping and adaptivity.
- Upper and lower buckles are easily locked into the closed position by a keyhole snapping system.
- Easily exchangeable extension stops (0, 5, 10, 15, 20, 25 and 30 degrees). Replaceable (as spare parts)
- The RK-7 Knee Brace is available in four sizes (S, M, L & XL) for a more personalised and secure fit.

RK-1 PLASMA KNEE BRACE

MOTOCROSS / OFF-ROAD

£239.99

CODE:

6501725-13

SIZE:

S - M L - XL

ABOUT:

Anatomically profiled for all forms of off-road riding, the Supertech RK-1 knee brace has been engineered to provide comfortable knee support while still being lightweight, breathable and protective. This knee brace features a Nucleon Plasma knee protector encased in an innovative hybrid frame construction, consisting of a flexible composite over-injected on a high-performance polymer blend to offer superb frame rigidity while still being flexible at the upper and lower strap areas.

KEY FEATURES:

This brace provides optimal structural integrity and support while being ultra-lightweight and adaptive, and thus reduces the risk of sustaining injuries to the medial and lateral collateral ligament, the anterior and posterior cruciate ligament, and the lateral and medial meniscus.

The replaceable triple segmented knee cups are constructed with a polyurethane outer shell backed with a Nucleon Plasma protector for the optimum blend of impact protection, flexibility and scratch resistance.

The self-centering knee cup and the strategically positioned upper and lower patella extensions ensure maximum coverage regardless of the flexion or extension angles.

The extremely stable, slim-design four-point hinge system perfectly follows the articulation of the knee while the extension stops, which are available in a range from 0 to 30 degrees, assist in setting the brace to the desired maximum opening angle.

The stainless steel bushings in the four-point hinge system has an anti-oxidation treatment.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, the knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage in all riding positions.

- TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
 - Soft-touch thermoformed padding ensures the highest levels of rider comfort while keeping the knee brace securely in position. Replaceable as a spare part.
 - Soft-touch thermoformed condyle padding comes in different thicknesses for a customised fit. Replaceable as a spare part.
 - Equipped with four individual straps backed with a non-slip material to ensure the knee brace remains securely in position while riding.
 - High tensile strength buckles are robust while still being flexible for easy strapping and adaptivity.
 - Central buckles are easily locked into the closed position by a keyhole snapping system.
 - Inner-knee central buckles are mounted internally inside the frames to avoid contact with the bike.

RK-S KNEE BRACE SLEEVE

MOTOCROSS / OFF-ROAD

£24.99

CODE: 6700225-132

SIZE: ONE SIZE

ABOUT: Specifically designed to be worn with the Alpinestars' range of off-road boots and knee braces, the RK-S knee brace sleeve features a double layer compact construction for high levels of stretchability and overall comfort.

KEY FEATURES: The RK-S knee brace sleeve features a fold-over design at the top and the bottom and is engineered to be worn under a knee brace to further prevent it from slipping down while riding.

Wear resistant textiles for durability.

Stretchable textiles for enhanced rider comfort.

**TECH
SPECS:**

- Flat locked seams and soft-touch textile for enhanced comfort.
- Sublimated graphics for durability.
- Compatible with all Alpinestars knee braces.

S/M - LXL

Anatomically profiled for all forms of off-road riding, the Bionic Pro plasma knee protector has been engineered to be lightweight, breathable, comfortable and protective, and features a removable Nucleon Plasma knee protector embedded into a chassis that is abrasion resistant on the outer and highly breathable on the inner for maximum performance.

Two independent thermoplastic shells are strategically positioned over the patella for enhanced levels of abrasion resistance and sliding performance, while also delivering additional impact performance.

The innovative slip joint construction ensures high levels of articulation while simultaneously ensuring the protector remains snugly in position.

The wide elasticated top strap delivers superior comfort and a secure closure.

Nucleon Plasma is a viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies. Lightweight and highly ventilated, this knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

- TECH SPECS:

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.
 - Extra lower and side padding for extended coverage.
 - Level 2 CE certified Nucleon Plasma knee protector is removable for easy cleaning.
 - Constructed with a soft tactile inner padding for enhanced rider comfort.
 - Pre-shaped construction features soft touch perforated stretchable padding for enhanced comfort and superior airflow.
 - The anatomically sculpted upper calf and upper hem silicon strips keep the protector securely in position

TECH 10 BOOT

MOTOCROSS / OFF-ROAD

£599.95

CODE: 2010020

SIZE: US 7 - 14 / EUR 40,5 - 49,5

ABOUT: The Tech 10's design is guided by three priorities; to improve overall functionality, performance and safety, decrease weight and reduce material volume. The result is a boot with a greater range of movement and flexibility while offering better control over the flexion and torsion forces that significantly improve boot performance, giving the rider greater confidence and protection.

KEY FEATURES: Material composites have been created that are lighter in weight and more durable to ensure they hold up to the rigours of off-road riding. The new, cold-forged, aluminum buckles are a result with an easier to operate, more durable and self-aligning closure that offer a positive hold across the upper surfaces of the boot.

The result has yielded over 400 grams (almost 1lb) in weight reduction for the Tech 10.

The design also reduces the Tech 10's profile and physical size. It is more streamlined with newer, lighter, more durable composite materials and a more integrated approach to the construction of the components which dynamically enhance the chassis of the boot and utilise more advanced bonding processes.

The Tech 10 chassis combines advanced lightweight microfibre and impact and abrasion resistant TPU shell.

Combining with the dual front and rear blade connectors, the Frontal Flex Frame gives the Tech 10 a complete and seamless flexion control system, from the foot shell all the way up to the shin plate, offering high performance double motion control, preventing over-compression and hyper-extension, featuring:

Engineered frontal flexion control is offered by a dual density TPU connector system, uniting the lower buckle plate with the upper blade connector, buckle and shin protector. Engineered to 'float' freely between the lower and upper boot construction, the Frontal Flex Frame acts as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex, progressively releasing force which dampens and absorbs impact energies.

Asymmetrical, dual pivot arms on boot frame.

A unique feature of the Tech 10 is the ankle control system developed in the outer shell construction, allowing natural ankle movement, vertical compression control and improved impact protection.

Asymmetrical medial and lateral double pivot system for improved levels of flexibility and precision for both independent and synchronised movement. The medial pivot arm's higher placement reduces material volume in the lower part of the boot, creating more space for the patented inner ankle brace system to have free movement and improve control. Reducing the volume on the inner side also reduces abrasion, where the boot is in contact with the bike and improves grip and feel.

PROTECTION: - Dual density TPU rear blade system engineered to prevent hyperextension while offering improved flex control and impact resistance.

- Built into the Tech 10's unique and lightweight singlepiece co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded poly-foam to absorb high impact energies during a crash. DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing, energy being transferred to the ankle and lower leg. DHCP has been used by Alpinestars athletes in the demanding environments of professional Supercross and Motocross.

- The bio-mechanical inner ankle brace features lighter, anatomically redesigned medial and lateral torsion arms which are compact and offer increased range of movement and control. In conjunction with the outer boot chassis, the ankle brace gives vertical and lateral protection from ankle and leg compression and rotation and progressive damping of torsional forces during an accident, while still allowing natural freedom of movement.

- A double pivot system allows the Tech 10 to retain its integrity while flexing which removes the need for alternative torsion bars for varying ankle widths and crucially gives the essential progressive resistance to rotational and vertical forces which, otherwise, are so damaging to ankles, knees, upper legs and pelvis if not arrested in a controlled way.

DIVA PINK/WHITE

2010020-3812

TECH 10 BOOT

MOTOCROSS / OFF-ROAD

TECH SPECS:

- Low-profile, pull-on design for reduced material build, less weight and to facilitate easier and quicker wearing.
- Innovative flexion inserts work seamlessly with the Tech 10's flex support system for ultimate in performance.
- TPU protection and shock absorbing padding on the heel and ankles and an ultra-thin and flexible forefoot area for increased sensitivity and control.
- Dual compound removable anatomic footbed includes EVA for comfort and support and aids even weight distribution.
- Sole with proprietary grip sculpturing delivers superior foot-peg performance, grip and mud and water run-off.
- The central sole insert features micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.
- Triple buckle closure system features a nylon and fiberglass compound for improved durability and strength, and the slim-line buckles include high-impact bridge closures which are cold forged for precision and strength.
- The closure system features contra-closure, doubling closure security and a quick release/locking system with self-aligning, memory, design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.
- Frontal protection features a dual closure system with an internal microfibre flap, plus hook and loop fasteners for a precise fit closure beneath the buckle giving greater, micro-adjustable precision which is convenient to operate.
- Soft microfibre gaiter helps seal out excessive water and dirt entry.
- Poly-fabric lining with 3D open cell foam incorporates anti-slip suede in heel area, keeping the foot located inside the boot.

TECH 10 ENDURO BOOT

ENDURO / OFF-ROAD

£639.99

CODE: 2010025

SIZE: US 7 - 14 / EUR 40,5 - 49,5

ABOUT: Alpinestars Tech 10 is the benchmark motocross boot and now the performance and protection envelope has been raised even higher with the creation of the Tech 10 Enduro version, a boot with a completely redesigned sole specifically engineered to offer the ultimate grip while offering Enduro riders with the highest levels of protection.

KEY FEATURES: The CE-certified Tech 10 Enduro boot features its own dedicated 'Enduro' spec dual compound sole that is seamlessly integrated to the multi-density foot base structure with built-in support to offer superior durability, grip and feel while riding, and enhanced performance on the shifter.

The Tech 10 Enduro's design improves overall functionality; performance and safety, while decreasing weight and reducing material volume.

A key innovative feature of the Tech 10 Enduro is the patented Frontal Flexion Control Frame. Combining with the dual front and the rear blade connectors, the frame acts as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex. This gives the Tech 10 Enduro boot a complete and seamless flexion control system, from the footshell all the way up to the shin plate, offering high performance double motion control, preventing over-compression and hyper-extension.

The Tech 10 Enduro is equipped with Alpinestars ankle control system, which is integrated in the outer shell to allow natural ankle movement, vertical compression control and improved flex control and impact resistance. This is complemented by inner ankle brace and the unique heel protection innovation; the patented Dynamic Heel Compression Protector (DCHP). This significantly reduces the effect of excessive, potentially injury-causing, energy being transferred to the ankle and lower leg.

The Tech 10 Enduro has a Frontal Flex Frame, a complete and seamless flexion control system, from the foot shell all the way up to the shin plate, offering high-performance double motion control to prevent over-compression and hyper-extension. Incorporated into the frontal outer chassis of the boot and working in conjunction with Alpinestars unique, patented, dual torsion bar inner ankle brace, the Frontal Flex Frame is engineered to 'float' freely between the upper and lower boot, acting as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex, progressively releasing force which dampens and absorbs impact energies.

Other rider friendly touches include a slimmer and more streamlined profile with a contoured calf protector ergonomically wrapping around the leg, a dual compound removable anatomic footbed with EVA for comfort, support and even weight distribution, an ultrathin and flexible forefoot area for increased sensitivity and control, and a new easier to operate, more secure mechanism on the triple buckle closure system.

PROTECTION: - The TPU lower shell features an innovative design on the shifter area, with a dedicated design for the left and right foot. This area is further strengthened with a metal shank and is reinforced on the toe zone for impact and abrasion resistance.

- The lightweight microfibre upper features extensive TPU protection on the toes, foot, heel, ankle, calf and shin, with extra hard compounds on the toe-box and heel for additional impact and abrasion resistance.

- Equipped with a poly-fabric lining with 3D open cell foam and anti-sliding suede reinforcement on the heel area for enhanced abrasion resistance.

- The Tech 10 Enduro boot is CE certified to EN 13634:2017.

TECH 10 ENDURO BOOT

ENDURO / OFF-ROAD

- TECH SPECS:**
- Co-injected for strength and to maintain the boot's structure, the Tech 10 Enduro's exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.
 - The shin plate area is equipped with strategically positioned ventilation windows for superior airflow and ventilation without compromising impact protection.
 - The soft microfibre gaiter features a dedicated design especially for the back of the boot that effectively seals out excessive water and dirt entry.
 - Dual closure system with an internal microfibre flap, plus hook and loop fasteners, for a precise fit closure.
 - The closure system includes lightweight polymer buckles plus an aluminium frame with self-aligning, quick release closures for a customised secure fitment.
 - The pull flap is engineered to offer increased prehensibility.
 - The Tech 10 Enduro boot is CE certified to EN 13634:2017

TECH 7 BOOT

MOTOCROSS / OFF-ROAD

£439.99

CODE: 2012025

SIZE: US 5 - 16 / EUR 38 - 52

ABOUT: Packed full of innovative materials, technology and design features, the Tech 7 has been completely overhauled to ensure this exceptional off-road all-rounder continues to excel on the dirt. This boot has been engineered to be lighter, more comfortable and more protective than ever, while still delivering exceptional feel with the bike.

KEY FEATURES: The TPU lower shell features an innovative design on the shifter area, with a dedicated design for the left and right foot. This area is further strengthened with a metal shank and is reinforced on the toe zone for impact and abrasion resistance.

Equipped with a medial and lateral double pivot system for improved levels of flexibility and precision control.

The main flexion of the boot is supported around the medial and lateral ankle by a low profile pivot system for superior freedom of movement and rider comfort.

The front flexion zone features innovative shock absorbing inserts in the front bellow zone for progressive support.

Shock absorbing padding is also strategically positioned on the ankles and shin plate for increased impact absorption.

The sole includes an innovative wear limit indicator embedded in the foot peg area. This layer releases a red layer when the sole is worn out and needs replacing.

The boot structure beneath the wear limit indicator is surrounded by a Kevlar layer that maintains the structure and integrity of the boot while also protecting the boot.

TECH 7 BOOT
MOTOCROSS / OFF-ROAD

TECH 7 BOOT

MOTOCROSS / OFF-ROAD

- PROTECTION:**
- Upper suede leather with a lightweight microfibre construction for superior impact and abrasion resistance.
 - The upper features extensive TPU protection on the toes, foot, heel, ankle, calf, and shin with extra hard compounds on the toe-box, heel for additional impact and abrasion resistance.
 - Additional TPU is positioned on the back bridge for protecting the Achilles tendons.
 - Equipped with a poly-fabric lining with 3D open cell foam and anti-sliding suede reinforcement on the heel area for enhanced abrasion resistance.
 - The one-piece sole is constructed from highly durable, dual compound vulcanised rubber for durability and protection.
 - The Tech 7 boot is CE certified to EN 13634:2017.

TECH SPECS:

- The closure system includes polymer buckles plus an aluminium frame with self-aligning, quick release closures for a customised secure fitment.
- The buckle receiver is engineered to be self-aligning, guaranteeing a secure fit while preventing strap rotation.
- The soft microfibre gaiter features a dedicated design especially for the back of the boot that effectively seals out excessive water and dirt entry.
- The medial panel is constructed from TPU and incorporates an enlarged rubber insert for maximum grip contact with the bike and improved heat and abrasion resistance.
- The pull flap is engineered to offer increased prehensibility.
- Equipped with a reinforced hook and loop closure for a comfortable, highly customised closure.

TECH 5 BOOT

MOTOCROSS / OFF-ROAD

£329.99

CODE: 2015015

SIZE: US 5 - 16 / EUR 38 - 52

ABOUT: The Tech 5 boot is an advanced multi-material, multi-panel construction boot that incorporates an innovative microfibre chassis for durability and light weight, a medial biomechanical pivot system for excellent levels of support and stability, and extended accordion flex zones for enhanced comfort; the Tech 5 delivers plenty of performance bang per buck.

KEY FEATURES: Innovative one-piece TPU injected dual compound foot shell with excellent impact and abrasion resistance and unmatched levels of safety. This shell is reinforced by a metal shank inside and toe reinforcement co-injected in harder compound.

Microfibre upper for flexibility, abrasion resistance, water-resistance and weight-saving, and this material ensures a consistent fit while being easy to maintain and clean.

Medial-facing bio-mechanical pivot system links lower and upper parts of the boot and gives front and rear flexibility and structural support.

Both the inward-facing upper and lower panels are constructed from specifically formulated polymer with grip sculpture patterning for maximum contact with bike and improved abrasion resistance.

PROTECTION:

- Contoured advanced polymer core structure envelopes upper boot for structural integrity and abrasion resistance while allowing excellent levels of controlled flex.
- Anatomically profiled, high modulus polymer shin plate for superior impact and abrasion resistance.
- Contoured advanced polymer core structure envelopes upper boot for structural integrity and abrasion resistance while allowing excellent levels of controlled flex.
- The Tech-5 boot is CE certified.

TECH 7S BOOT

YOUTH MOTOCROSS / OFF-ROAD

£214.99

CODE: 2015017

SIZE: US 2 - 8 / EUR 34 - 42

ABOUT: Featuring a unique, high strength sole construction offering durability and protective performance the Youth Tech 7S boot has been specifically developed for youth or smaller framed riders. With class-leading protection, innovative performance features such as pivot system to movement and flexibility the Youth Tech 7S is built to withstand the toughest of terrains.

KEY FEATURES: The Youth Tech 7S is specifically designed and sized for junior and /or smaller framed riders.

Features a PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance and weightsaving, and this material ensures a consistent fit while being easy to maintain and clean.

Extended microfibre gaiter helps seal out excessive water and dirt entry.

Soft poly foam reinforcement on ankles and collar for long lasting comfort and shock absorption.

- PROTECTION:**
- Contoured shin plate is injected with high modulus TPU for excellent levels of impact and abrasion resistance.
 - Medial facing side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
 - One-piece injected dual compound foot shell with coinjected hard toe protector and integrated steel shank. The shell is highly resistant to abrasion and impact, adds to the boot's overall durability and improves boot's streamlining.
 - The Tech 7S boot is CE certified to EN 13634:2010.

Are your Alpinestars off-road boots looking a little worse for wear? Don't worry, we can help!

We understand that your Alpinestars boots are more than just footwear; they're an investment in your riding experience. That's why we're dedicated to providing top-notch repair services to keep your boots in top condition.

At Bickers Repairs, we specialise in repairing all types of Alpinestars off-road boots. Whether you need a new sole, a replacement buckle, or a complete rebuild, we can get your boots back in top condition.

OUR SERVICES:

- **Resoling:** We specialise in replacing worn-out soles with high-quality materials that match your boots' original specifications.
- **Heel repair:** We can repair cracked or damaged heels, ensuring a comfortable and secure fit.
- **Seam repair:** Our skilled technicians can repair any damaged seams, preventing further damage and ensuring the longevity of your boots.
- **Zipper replacement:** We can replace broken or malfunctioning zippers with high-quality replacements.
- **Cleaning and conditioning:** We offer professional cleaning and conditioning services to keep your boots looking and feeling their best.

WHY CHOOSE BICKERS-REPAIRS?

- **Expert craftsmanship:** Our team of experienced technicians has years of experience repairing Alpinestars boots.
- **High-quality materials:** We use only the finest materials to ensure your boots are repaired to the highest standards.
- **Fast turnaround time:** We understand that you need your boots back quickly, so we offer a fast turnaround time on all repairs.
- **Convenient online service:** Our online service makes it easy to get your boots repaired without leaving your home.
- **Satisfaction guarantee:** We're committed to your satisfaction. If you're not happy with our repair service, we'll make it right.

HOW IT WORKS:

1. Submit a repair request: Fill out our online repair request form, providing details about the damage to your boots.
2. Ship your boots: We'll provide you with a prepaid shipping label to send your boots to our repair facility.
3. Repair process: Our technicians will assess the damage and provide you with a repair estimate.
Once you approve the estimate, we'll start the repair process.
4. Return your boots: Once your boots are repaired, we'll ship them back to you, ready to hit the track again.

Don't let damaged boots slow you down. Let Bickers-Repairs get you back in the saddle.
