## SUPERTECH MX GLOVES

MOTOCROSS / OFF-ROAD

£49.99

NEW  
ITEM

**CODE:** 3560526

**SIZE:** S - 4XL

**ABOUT:** Engineered for pro-level riders, the Supertech MX Gloves offer a premium single-layer design with a seamless, ergonomic hand-mapped racing fit. Built from high-flex stretch materials, these gloves deliver exceptional control and responsiveness on the bike's levers, setting a new standard for lightweight comfort and performance.

**KEY FEATURES:**

Pro-rider Design and Performance: Tailored to deliver a pro-level fit, control, and comfort essential for racing.

Advanced Construction: Constructed with a durable monolayer stretch backhand and seamless design, ensuring high levels of flexibility and comfort. Enhanced Airflow: Extensive laser perforations, ventilated fourchettes, and a perforated palms deliver premium ventilation and keeping hands cool. High Levels of Grip: Silicone grips on the first and second fingers, along with reinforced thumbs, provide long-lasting durability in high contact areas, giving riders superior control on the bike's levers.

**CONSTRUCTION:**

- Highly flexible and advanced hand mapped race fit for unrivalled control.
- Backhand crafted from a premium, single-layer, high-flex stretch material with a seamless construction.
- Extensive laser perforations and ventilated fourchettes promote airflow, enhancing rider comfort.
- Sew-free cuff closure ensures a secure fit.
- Single-layer, high-flex perforated palm adds to the glove's lightweight feel.
- Silicone grip on first and second fingers for high levels of grip.
- Reinforcement on thumbs for enhanced durability.

TECHSTAR GLOVES

MOTOCROSS / OFF-ROAD

£39.99

CODE:3560125

SIZE:S - 2XL

ABOUT:Made from advanced, stretch fabric for a precise feel with the levers and grips, the new Techstar Gloves are designed to offer pro-level protection. Featuring a high flex upper construction with a thermoformed knuckle area and stretch micro ripstop top hand for additional comfort and protection, the Techstar Gloves have a reinforced synthetic suede palm for high levels of durability. The palms are made from conductive material for flawless use with smartphones and other GPS touchscreen devices. The gloves also have a new molded, seamless closure for a secure fit.

KEY FEATURES:

Race-Ready Design:

Tailored specifically for professional racing to meet the high demands of top-level performance and control.

Durable Grip and Comfort:

Reinforced palm and thumb with hyper-flexible suede ensure lasting durability in high-contact areas, delivering confidence and control on the grips.

Optimised Fit and Flexibility:

Ergonomic stretch insert on the palm provides a secure, comfortable fit that moves naturally with your hand for precise handling.

- CONSTRUCTION:
- Highly flexible and ultra-fitted construction for enhanced control and optimised freedom of movement.

- One-piece synthetic conductive palm and stretch micro ripstop backhand.

- Multi-material construction incorporates stretch micro ripstop and synthetic suede for a performance fit and enhanced durability.

- Thermoformed neoprene knuckle area for enhanced comfort and protection.

- Wrapped fingertips on first and second fingers.

- Expansion seams on first, second and third fingers.

- Silicone grip on first and second fingers.

- Sew-free cuff binding.

- New seamless closure strap with molded hook Velcro fastener on the inside for a safe and secure closure.

- Padded landing zone for increased comfort.

- Pull tab with silicone grip for quick and easy entry into the glove.

- Sublimated graphic on backhand.

RADAR PRO GLOVES

MOTOCROSS / OFF-ROAD

£32.99

CODE:3560325

SIZE:S - 2XL

ABOUT:Engineered for maximum airflow and lightweight performance, the Radar Pro race gloves have been developed in close collaboration with Alpinestars' toplevel athletes to create a sleeker, more minimalistic design, further enhancing freedom of movement and control on the track.

KEY FEATURES:

Highly breathable, ultra-lightweight and packed with excellent comfort features, the Radar Pro Gloves incorporate a single-layer construction all around, with a single-layer 4-way stretch mesh backhand and synthetic suede side hand reinforcements for high levels of comfort and improved feeling with the bike's controls. For the MX26 line, the Radar Pro Gloves have conductive material for the palm and fingers, and a seamless integrated, wrist closure strap.

Optimised Fit and Feel:

Performance construction with a singlelayer palm and stretchable mesh backhand provide a tailored fit and enhanced tactile feedback for ultimate control.

Enhanced Comfort and Mobility:

One-piece synthetic suede palm with built-in stretch offers excellent comfort and freedom of movement, ensuring easy handling of grips and levers.

Increased Durability and Grip:

Wrapped fingertips and silicone grip on first and second fingers for enhanced durability.

Optimal Breathability:

Thumb patch perforations ensure enhanced airflow.

BLACK/WHITE

3560325-12

CONSTRUCTION:

- Single-layer construction.

- Single-layer, 4-way stretch mesh backhand with synthetic suede side hand reinforcements.

- Conductive palm and fingers for use with smartphones and touchscreen devices.

- Synthetic suede, perforated thumb reinforcement.

- Localised perforations on the synthetic suede thumb for performance.

- Wrapped tips for durability and silicone grip on first and second fingers.

- Sew-free cuff binding with internal synthetic suede provides maximum comfort on the wrist and soft touch.

- Pull tab with silicone grip for quick and easy entry into the glove.

- Seamless molded hook Velcro closure strap for security.

- Printed graphic on backhand.

FULL BORE V2 GLOVES

MOTOCROSS / OFF-ROAD

£27.99

CODE:

3560426

SIZE:

S - 4XL

ABOUT:

The Full Bore v2 Gloves offer a powerful balance of performance, protection, and airflow, designed with motocross riders in mind. Built from advanced, reinforced, breathable, stretch fabric, with a newly engineered ergonomic TPR knuckle, these gloves ensure an exceptional fit and high levels of rider comfort, ideal for those seeking a durable and protective glove for intense MX riding sessions.

KEY FEATURES:

Reliable Protection and Comfort:

Newly designed TPR knuckle protectors deliver both effective protection and comfortable flexibility for demanding rides.

Proven durability:

Reinforced synthetic suede palm enhances durability and allows easy use of mobile devices without removing the gloves.

Breathable Flex Construction:

The gloves' breathable flex fabric upper construction and the ventilated stretch fourchettes delivers premium comfort and mobility on the bike's controls.

- CONSTRUCTION:
- Upper is constructed from a breathable stretch fabric that provides high levels of rider comfort and an optimised fit.
  - Ventilated stretch fourchettes for enhanced levels of comfort and flexibility.
  - The neoprene cuff, with its integrated wrist strap, offers a secure and personalized fit while maximizing comfort and flexibility.
  - Backhand is reinforced with an advanced TPR knuckle protector specifically designed to allows each part of the protector to move with the hand, maintaining mobility and comfort during high-intensity movements typical of motocross and off-road riding.
  - Reinforced synthetic suede palm for high levels of durability and a secure grip on the handlebars and bike's levers.
  - Perforated, reinforced thumb patches for added durability, abrasion resistance, and airflow.
  - Silicone print on the first and second fingers for optimised grip with the bike's controls.
  - Pull tab with a silicone grip for easy on-off.

BIONIC PLASMA LT PROTECTION JACKET LS
MOTOCROSS / OFF-ROAD
£239.99

CODE: 6500226
SIZE: S - M - L - XL - XXL
ABOUT: Engineered for all forms of off-road riding, the Nucleon Plasma LT Protection Jacket LS has been optimized to deliver effective impact protection while still allowing a high degree of freedom of movement.
KEY FEATURES: Highly comfortable: The Nucleon Plasma Protectors in this jacket are constructed from a USDA BIOBASED certified viscoelastic material, which is molded into a structure that is pliable in all directions while maintaining the ability to dissipate impact energy.
The main chassis is constructed from a soft tactile highly breathable stretch mesh fabric for optimised cooling performance.
Extended coverage: Additional upper arm padding for enhanced roost coverage. Equipped with additional side pads for additional coverage of the upper hip zones.
Height adjustable: Removable strap system with height adjustability via the lower central back hook and loop patch for optimum positioning of the back protector.
Premium Protection: Features CE Level 1 Certified Nucleon Plasma Shoulder, Elbow, Back and Chest Protectors.

BLACK/WHITE
6500226-12

- CONSTRUCTION: - Strech and vented moisture wicking treated base layer, with Abrasion resistant outer textile over protector pockets for superior durability.
- Offset side zipper for enhanced ergonomic protection.
- Rotating strap buckles ensure the strap caters to a wide variety of body shapes and sizes.
- Adjustable side belts to secure the chest protector in position while eliminating any unwanted movement.
- YKK locking zipper to prevent any unwanted zipper movement while riding.

Table with 2 columns: Protection Area and Level. Rows include BACK (EN 1621-2:2014), CHEST (EN 1621-3:2018), and ELBOWS & SHOULDERS (EN 1621-1:2012), all rated LEVEL 1.

BIONIC PLASMA LT PROTECTION JACKET SS
MOTOCROSS / OFF-ROAD
£199.99

CODE: 6500826

A-4 PLASMA CHEST PROTECTOR
MOTOCROSS / OFF-ROAD
£149.99

CODE: 6500526
SIZE: M - L - XL - XXL
ABOUT: Anatomically profiled for all forms of off-road riding, the A-4 Plasma Chest Protector features a semi-rigid thermoplastic polyhedron design chest protector and a Nucleon Plasma back protector that are engineered to be lightweight, breathable, comfortable, adaptive and protective.
KEY FEATURES: Highly flexible Nucleon Plasma Back Protector: Constructed from viscoelastic material engineered from bio-based polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies.
Lightweight and highly ventilated, this protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.
Lightweight and ultra-vented chest armor: The chest outer shell's design is based on geodesic polyhedrons, and like a geodesic dome, less material is needed to achieve the desired structural strength and imposed load performance when compared to flat or unfaceted surfaces.
This results in a protector where the whole is greater than the sum of all its parts, making the new A-4 Plasma Chest Protector supremely light-weight and ventilated.
The over-injected flexible side wings of the chest protector perfectly follow the body's contours for superior comfort and freedom of movement.
Optional Race kit: Engineered to be compatible with the Nucleon Plasma Extended Roost Coverage kit which includes Upper and Lower Chest Extensions, and an additional Y-Strap System to use the A-4 Chest without the back protector.
Rib and shoulder coverage: A-4 Plasma Chest Protector features highly perforated, adjustable and detachable rib and shoulder padding for additional coverage against roost and impact.

- CONSTRUCTION:
- Equipped with adjustable shoulder and side straps for an optimised performance fit.
  - Removable soft tactile thermoformed shoulder padding for enhanced rider comfort.
  - The lining on the back protector offers a soft tactile feeling against the skin while maintaining the integral structure of the protectors and reducing the risk of any material tearing.
  - The lining is ribbed for superior airflow while also reducing the amount of material that is in contact with the skin.
  - The perforated 3D mesh chassis also offers additional protection against tire roost.
  - Bionic Neck Support compatibility via the BNS shoulder pull tabs.
  - USDA certified bio-based eco-friendly and sustainable impact absorbing material.

SX-1 PLASMA KNEE PROTECTOR
MOTOCROSS / OFF-ROAD
£114.99

CODE: 6500326
SIZE: S - 2XL
ABOUT: The SX-1 Plasma Knee Protector features a Plasma Knee Protector embedded into a highly ventilated semi-rigid frame construction for superior impact protection, while the integrated Dual Gear System (DGS) promotes the natural articulation of the knee.
KEY FEATURES: Nucleon Plasma: Features a Nucleon Plasma knee protector that is constructed from a USDA BIOBASED certified viscoelastic material, which is molded into a structure that is pliable in all directions while maintaining the ability to dissipate impact energy.
Dual density co-injected frame for a supportive structure with unrivaled comfort and adaptability: Engineered with a scooped lower extension made from a soft polymeric blend to avoid any pressure points associated with a hard edge from occurring as a result of the boot pushing against the protector.
The same scooped design is also applied to the upper extension, and this prevents the protector digging into the skin and causing discomfort while riding.
Controlled natural movement: DGS – Dual Gear System, both the upper and lower frames have integrated gear profiles that ensure a smooth hinge function to promote the natural articulation of the knee.
The ergonomically sculptured frames of the SX-1 Plasma Knee Protector feature strategically positioned overinjected rigid and flexible shells to ensure the frames adapt to a wide variety of leg circumferences.
The Patella System is engineered to offer full coverage of the knee cup regardless of the degree of extension while the rigid outer Patella System shell prevents injuries from handlebar strikes.

- CONSTRUCTION:
- Abrasion resistant outer textile over protector pockets for superior durability.
  - Offset side zipper for enhanced ergonomic protection.
  - Rotating strap buckles ensure the strap caters to a wide variety of body shapes and sizes.
  - Adjustable side belts to secure the chest protector in position while eliminating any unwanted movement.
  - YKK locking zipper to prevent any unwanted zipper movement while riding.

BIONIC PLASMA YOUTH KNEE PROTECTOR

MOTOCROSS / OFF-ROAD

£59.99

CODE:

6540226

SIZE:

S - 2XL

ABOUT:

Engineered specifically for youth off-road riders, the Bionic Plasma Youth Knee Protector has been engineered to be lightweight, comfortable and protective, and features a removable Nucleon Plasma knee protector embedded into a highly breathable chassis for enhanced rider comfort.

KEY FEATURES:

Soft, Lightweight and highly ventilated:

This knee protector offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.

Nucleon Plasma is a viscoelastic material engineered from biobased polymers and formed into a structure that is pliable in all directions while maintaining the ability to dissipate impact energies.

The chassis is constructed with a 3D mesh on the front for superior levels of ventilation and airflow with an abrasion resistant fabric covering the knee.

Features a soft tactile stretch mesh construction on the rear to cater for a wide variety of calf sizes, while the open construction at the back of the knee helps prevent heat build-up while promoting ventilation.

Extra lower and side padding for extended coverage.

- CONSTRUCTION:
- Level 1 CE certified Nucleon Plasma knee protector is removable for easy cleaning.

- USDA certified bio-based eco-friendly and sustainable impact absorbing material.

- Constructed with a soft tactile inner padding for enhanced rider comfort.

- Pre-shaped construction features soft touch perforated stretchable padding for enhanced comfort and superior airflow.

- The anatomically sculpted upper calf and upper hem silicon strips keep the protector securely in position

TECH 10 SUPERVENTED BOOTS

MOTOCROSS / OFF-ROAD

£679.99

CODE:2010520

SIZE:US 7 - 14 / EUR 40,5 - 49,5

ABOUT:

According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017. Construction uses a highly breathable, perforated microfiber. TPU features is combined with ventilation zones and a new air flow system sole for breathability and superior ventilation. Evolutionary new shin plate design with ventilation windows strategically positioned to allow more ventilation without compromising the impact protection. Air vents on the TPU lateral calf plus breathable mesh insert improve comfort and reduce fatigue on short and long rides.

KEY FEATURES:

**New performance double pivot motion control system features:** Medial and lateral double pivot system for improved levels of flexibility and precision control.

Engineered bi-density front flexion control is strategically positioned over the mesh area, combined with a dual front blade system and shock absorber insert to offer mechanical progressive force release to dampen and absorb impact energies.

Re-designed dual density TPU rear blade system is engineered to prevent hyper-extension while offering improved flex control and impact resistance.

ORANGE FLUO/  
BLACK/WHITE  
2010520-4512

CONSTRUCTION:

Built into the Tech 10's unique and lightweight single-piDOT / ECE co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded polyfoam to absorb high impact energies during a crash.

DCHP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg.

DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.

Co-injected for strength and structure, the exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.

The contoured calf protector ergonomically wraps around the rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces.

Shin plate features a new anatomic design for reduced surface area and weight-saving.

Completely re-designed sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off.

Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support. The sole offers superior durability, grip and feel while riding, and improved performance on the shifter.

The central sole insert features a micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.

Anatomically optimised for weight-saving and ergonomics, the new mechanical buckle closure system features a nylon and fiberglass compound for improved durability and strength.

The new slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength.

The buckle closure system features a memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.

Innovative, lightweight upper combines advanced lightweight microfiber with an impact and abrasion resistant TPU shell.

The foot shell features five different compounds in a single lightweight piDOT / ECE to offer strength while maintaining flexibility and structural integrity.

TECH 10 BOOTS

MOTOCROSS / OFF-ROAD

£629.99

CODE:2010020

SIZE:US 7 - 14 / EUR 40,5 - 49,5

ABOUT:

The Tech 10 has set the standard for Motocross boot performance and protection in the industry for well over a decade now, with an ongoing focus on product development and innovation that continues to raise the performance envelope higher and higher. At Alpinestars we believe in perfection through innovation while maintaining the iconic Tech 10 look, the latest model of the boot offers riders the ultimate in feel, comfort, and overall safety, raising the bar of what a premium motocross boot should be higher than ever before.

KEY FEATURES:

**Unparalleled Flex Control:** A breakthrough innovation for the Tech 10 is the introduction of Alpinestars patented Frontal Flex Frame. Combining with the dual front and rear blade connectors, the Frontal Flex Frame gives the Tech 10 a complete and seamless flexion control system, from the foot shell all the way up to the shin plate, offering high performance double motion control, preventing over-compression and hyper-extension, featuring:

Engineered frontal flexion control offered by a dual-density TPU connector system, uniting the lower buckle plate with the upper blade connector, buckle and shin protector. Engineered to 'float' freely between the lower and upper boot construction, the Frontal Flex Frame acts as a shock absorber by distributing energy across the boot frame while controlling forward and rearward flex, progressively releasing force which dampens and absorbs impact energies.

Asymmetrical, dual pivot arms on boot frame.

**Ankle Control System:** A unique feature of the Tech 10 is the ankle control system developed in the outer shell construction, allowing natural ankle movement, vertical compression control and improved impact protection.

BLACK/RED  
2010020-13

CONSTRUCTION:

Innovative, lightweight upper construction, the Tech 10 chassis combines advanced lightweight microfiber and impact and abrasion-resistant TPU shell. Foot shell features five different compounds in a single lightweight piece to offer strength while maintaining flexibility and structural integrity. Foot shell incorporates heel and toe protection that is highly resistant to abrasion and impact and adds to the boot's overall durability. Foot shell also includes integrated shank for support and structural integrity. Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure beneath the buckle giving greater, micro-adjustable, precision which is convenient to operate. Soft microfiber gaiter helps seal out excessive water and dirt entry.Poly-fabric lining with 3D open cell foam incorporates anti-slip suede in heel area, keeping the foot located inside the boot.

TECH 7 BOOTS

MOTOCROSS / OFF-ROAD

£439.99

CODE:2012025

SIZE:US 5 - 16 / EUR 38 - 52

ABOUT:

Packed with innovative materials, technology and design features, the Tech 7 has been completely overhauled to ensure exceptional off-road performance in the dirt. Engineered to be lighter, more comfortable and more protective than ever, the Tech 7 Boots deliver exceptional feel on the bike.

KEY FEATURES:

The TPU lower shell features an innovative design on the shifter area for reduced front roll and easy shift lever control, with a dedicated design for the left and right foot. This area is further strengthened with a metal shank and is reinforced on the toe zone for impact and abrasion resistance.

Equipped with a medial and lateral double pivot system for improved levels of flexibility and precision control.

Dedicated design on the medial side wall for improving the feel, support, and grip on the bike, while increasing the protection and durability of the boot.

New contoured TPU calf protector plate offers effective impact resistance.

The main flexion of the boot is supported around the medial and lateral ankle by a low profile pivot system for superior freedom of movement and rider comfort.

The front flexion zone features new innovative shock absorbing inserts in the front bellow zone for progressive support.

Shock absorbing padding is also strategically positioned on the ankles and shin plate for increased impact absorption.

New strap holder design offers maximum rotation and functionality, while reducing excessive rotation.

The sole is made with an innovative wear limit indicator embedded in the foot peg area. This layer displays a red layer alerting the rider when the sole is worn out and needs replacing.

The boot structure beneath the wear limit indicator is surrounded by a Kevlar® layer that maintains the structure and integrity of the boot while also protecting the boot.

CONSTRUCTION:

The closure system includes polymer buckles plus an aluminum frame with self-aligning, quick release closures for a customised secure fitment.

The buckle receiver is engineered to be self-aligning, guaranteeing a secure fit while preventing strap rotation.

The soft microfiber gaiter features a dedicated design especially for the back of the boot that effectively seals out excessive water and dirt entry.

The extended medial panel is constructed from TPU and its new design incorporates an enlarged rubber insert for maximum grip contact with the bike and improved heat and abrasion resistance.

The pull flap is engineered to offer increased prehensility.

Updated and compact TPU shin plate construction for greater range of fitment, equipped with a reinforced hook and loop closure for a comfortable, highly customised fit.

PROTECTION:

The upper features extensive TPU protection on the toes, foot, heel, ankle, calf, and shin with extra hard compounds on the toe-box and heel for additional impact and abrasion resistance.

Upper suede leather with a lightweight microfiber construction for superior impact and abrasion resistance.

Additional TPU rear bridge for protecting the Achilles tendons.

Equipped with a poly-fabric lining with 3D open cell foam and anti-sliding suede reinforcement on the heel area for enhanced abrasion resistance.

The Tech 7 Boots are CE certified to EN 13634:2017.

### ABOUT:

Featuring a specialised Enduro sole construction, the Tech 7 Enduro Boot is equipped with advanced protection and innovative performance features to create footwear built to perform in the toughest of terrains

### CONSTRUCTION:

Features a PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance and weight-saving, and this material ensures a consistent fit while being easy to maintain and clean.

The buckle closure system incorporates polymer buckles combined with a high impact aluminum frame for durability and weight saving.

The buckle system features a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security.

Medial and lateral dual pivot system, optimally positioned for enhanced flexibility and precise control.

Extended microfiber gaiter helps seal out excessive water and dirt entry.

### KEY FEATURES:

The 'Enduro' spec dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support to offer superior durability, grip and feel while riding, and enhanced performance on the shifter.

Expanded calf adjustment range for an optimised fit.

Softened front foot flex zone for enhanced mobility, on and off the bike.

### PROTECTION:

Extensive TPU protection on the toes, foot, heel, ankle, calf and shin, with extra durable compounds on the toe box and heel to bolster impact resistance further.

Contoured shin and ankle protectors for excellent levels of impact and abrasion resistance.

Soft reinforcements on the ankles for long lasting comfort and shock absorption.

The front flexion is supported and enhanced with a progressive design, featuring shock absorbing inserts into the front bellow for optimum performance.

Medial facing side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.

The Tech 7s boot is CE certified to EN 13634:2017.

# Are your Alpinestars off-road boots looking a little worse for wear?

## Don't worry, we can help!

We understand that your Alpinestars boots are more than just footwear; they're an investment in your riding experience. That's why we're dedicated to providing top-notch repair services to keep your boots in top condition.

At Bickers Repairs, we specialise in repairing all types of Alpinestars off-road boots. Whether you need a new sole, a replacement buckle, or a complete rebuild, we can get your boots back in top condition.

### OUR SERVICES:

- **Resoling:** We specialise in replacing worn-out soles with high-quality materials that match your boots' original specifications.
- **Heel repair:** We can repair cracked or damaged heels, ensuring a comfortable and secure fit.
- **Seam repair:** Our skilled technicians can repair any damaged seams, preventing further damage and ensuring the longevity of your boots.
- **Zipper replacement:** We can replace broken or malfunctioning zippers with high-quality replacements.
- **Cleaning and conditioning:** We offer professional cleaning and conditioning services to keep your boots looking and feeling their best.

### WHY CHOOSE BICKERS-REPAIRS?

- **Expert craftsmanship:** Our team of experienced technicians has years of experience repairing Alpinestars boots.
- **High-quality materials:** We use only the finest materials to ensure your boots are repaired to the highest standards.
- **Fast turnaround time:** We understand that you need your boots back quickly, so we offer a fast turnaround time on all repairs.
- **Convenient online service:** Our online service makes it easy to get your boots repaired without leaving your home.
- **Satisfaction guarantee:** We're committed to your satisfaction. If you're not happy with our repair service, we'll make it right.

### HOW IT WORKS

1. Submit a repair request: Fill out our online repair request form, providing details about the damage to your boots.
2. Ship your boots: We'll provide you with a prepaid shipping label to send your boots to our repair facility.
3. Repair process: Our technicians will assess the damage and provide you with a repair estimate. Once you approve the estimate, we'll start the repair process.
4. Return your boots: Once your boots are repaired, we'll ship them back to you, ready to hit the track again.

Don't let damaged boots slow you down. Let Bickers-Repairs get you back in the saddle.

*We look forward to serving you!*
