

RACING PRO TRACKWATER CONCENTRATE

Special coolant for motor racing

Description

RACING PRO TRACKWATER CONCENTRATE was specially developed for use in racing motorcycles, as conventional coolants cannot be used on professional racing circuits. These coolants usually contain substances that can pose a significant skidding risk if leaked onto the track. RACING PRO TRACKWATER CONCENTRATE is a special concentrate that does not contain any lubricating substances, but still protects the cooling system against corrosion, particularly the water pumps. The concentrate is mixed with the pure water in the cooling system at a ratio of 1:10.

Product features

- Specially designed for on-road racing use
- Glycol-free
- Protects the cooling system against corrosion
- Mixed at a ratio of up to 1:10
- Superior cooling function

Application

RACING PRO TRACKWATER CONCENTRATE is mixed with the pure water in racing motorbikes' cooling systems at a ratio of 1:10

Dosage

RACING PRO TRACKWATER CONCENTRATE should be mixed at a ratio of 1:10

Technical Data

Properties	Test according to	Unit	Values
Aspect			trüb
Colour			light yellow
Density at 20 °C		g/cm ³	1.036
Viscosity at 20°C	DIN 51562-1	mm ² /s	1.0
pH-value	DIN 51369		8.7
Refraction at 20°C	DIN 51423-1		1.370
Water hardness mg CaCO ₃		ppm	< 3.0
